18:17:56 From Steve Wilkins : Degree in Psychology studying perception. Worked in Acoustic Consulting, MAN Acoustics and Noise. Professional musician and have a wee studio for vanity production of many disks..

18:42:06 From Gary Louie : Not me!

18:49:23 From Steve Wilkins : Pete Townsend at the Kingdom stepped up to the mike and said 'thanks for inviting me to this fish tank to play.'

18:50:15 From Dan Mortensen : The first time I met Charlie was indeed in the HUB Ballroom at the UW in the Spring of 1972, which is also where I first met Rick although I'd been aware of him since early 1970. Charlie and Rick were there doing sound for a student produced series of 4? shows with Chick Corea and Return to Forever, Larry Coryell and the Eleventh House, and I'm not sure who the other two shows were. Charlie had just DOUBLED HIS PA, by getting 2 more JBL 4550's and 2 JBL horns (2440 drivers?). So he had 4 of each in the PA. I thought the PA sounded pretty good, and that was what I bought when I started buying sound gear the next year. I was doing stage lighting at the time, FYI, after the light show business kind of disappeared earlier that year or the previous one.
